PLACON®

\rř·Frřsh\

A fresh take on ready-to-go,
earth-loving food packaging.

RE *Defining Food Packaging*

Placon Crystal Seal® reFresh™ tamper-evident packages focus on the food and its freshness with quality designs, secure seals and exceptional clarity. Made from recycled PET bottles and thermoforms and 100% recyclable, it's amazingly versatile, multi-use packaging that allows you to market your commitment to a sustainable future.

RE *Inventing Recycled*

from design to disposal and everything in between.

Every reFresh package is made with our EcoStar® food-grade recycled PET, featuring up to 100% post-consumer material from curbside collected bottles and thermoforms. It's FDA-approved, extends the freshness of your food, and offers excellent clarity—because seeing your food is just as important as seeing that your packaging is sustainable.

RECreating Convenience

for the on-the-go market.

Crystal Seal reFresh tamper-evident packages come in a variety of shapes, sizes and configurations that work for grab-and-go, take-out and snack applications. Each package can be used with multiple kinds and combinations of food, and they're just as versatile in terms of presentation. Whether you use them right side up or upside down, your food is showcased beautifully, from every angle.

econotes

By the end of 2016, we will have recycled over 5 billion discarded consumer PET soda bottles, water bottles and thermoformed food and retail containers combined, and turned them into new, recycled and recyclable plastic packaging.

REVealing Package Clarity

that increases appetite appeal.

When you need to highlight the quality of your food, package clarity is everything. With reFresh, consumers see just how fresh and delicious your food really is. Our crystal-clear EcoStar® PET from recycled plastic bottles and thermoforms provides superior clarity throughout to increase impulse purchases.

RE Assuring Consumers

on the shelf and all the way home.

If you have a “green” package that’s also tamper-evident, it gives you an advantage in the marketplace, where consumers are pushing hard for both food safety and environmentally friendly packages. Crystal Seal® reFresh delivers on both counts. Our 100% recyclable packages feature a unique hinge design that visually identifies if a container has been tampered with. And our tight, leak-resistant seals ensure foods stay fresher, longer.
